Data Driven Multicloud Storage Architecture

- Enterprises are multi-cloud now... & increasingly so
- Enterprise clients are looking to develop a Data & Cloud strategy for their Infrastructure
- IBM is uniquely positioned to help clients understand their current situation, plan a future state & execute a strategy to get to this future state

Data Driven Multi-Cloud Architecture is:

Simple

- Data Portability between Private & Public Clouds
- Secure & Compliant
- High ROI Use Cases

Agile

- API Automation
- Native DevOps Capable
- Self Service

Ready for the future

- Service Level Driven
- Software Defined & Flash Optimized
- Modern Backup & Replication

Where you have ...

And you want to ...

Modernize traditional workloads

Private Clouds for traditional Application infrastructure that are as **agile, flexible** and **cost effective** as Public Clouds, that seamlessly extend to leverage Public Cloud Infrastructure as business demands

We offer ...

Transform with next-gen application

AI and Big Data infrastructure to support High Performance Data Analytics and HPC leveraging the power of the Open Source community, supporting the very small to the largest clusters in the world

Refactor apps / containerize

Integrated Docker and Kubernetes

Private Clouds for App modernization and agile development with full portability to leverage Public Cloud Infrastructure

IBM FlashSystem 9100 Multi-Cloud Solutions

IBM Storage & SDI

Proven solutions to transform infrastructure efficiency

- Select from 3 new IBM FlashSystem 9100 Multi-Cloud Software Solutions
- Deploy rapidly and with confidence based on IBM validated blueprints
- Easily purchased together with FlashSystem 9100

Data Reuse,
Protection

▪ IBM Solution

▪ Specific Blueprint

Flexible, Modern, Agile and Blazing Fast

IBM Storage Portfolio

Foundation for a Data Driven Multi-Cloud Infrastructure

Software Defined Storage

The foundation for Multi-Cloud & AI workloads

- IBM Spectrum Storage delivers the full suite of software defined capabilities for your data, on-premises or in the cloud; working together to increase flexibility & drive down costs
- Modernize your infrastructure by bringing new capabilities for private & hybrid cloud
- Optimize business-critical analytics & AI workloads

IBM Flash Portfolio

Bringing Flash to new levels of efficiency

- IBM Flash Storage is designed to meet your modern high-performance storage requirements: ultra-low latency, cost-effectiveness, operational efficiency, & mission-critical reliability
- AI assisted, next generation technology for multi-cloud environments

Introducing...

IBM FlashSystem 9100

Data Reuse & Protection

Maintaining the integrity of your data to support ongoing business

- Unlock the full value of your data, reusing data for DevOps, Test Dev, analytics, real time reporting & more
- Modern data protection made easy & cost effective for workloads born in the cloud
- Seamless management of data protection & disaster recovery operations
- Single interface to manage data protection wherever data resides

■ 3 Key Benefits

1. Performance
2. Resiliency
3. Capacity

What can you do with

3X

more

Performance

Private Cloud

Create and deploy Machine Learning / Deep Learning apps with PowerAI, Data-Science Experience in minutes and train 4x faster with Power9

- **Core Finance Applications**

Get eye-popping response times for client inquiries, frictionless mobile experiences, and increased overall client satisfaction as a result. Reports completed in seconds, not hours or minutes

Analytics Applications

Get even faster access to valuable analytics driving better business results with an NVMe platform combined with Watson Explorer engines

- **VDI Environments**

- Save time and money, defend against catastrophic failures, improve update speeds, and deliver an easy way to customize desktops for users or groups of users

- **SAP Databases**

- Reduce database recovery time, increase customer engagement, greater employee productivity, faster reporting, and deeper insights. Even with SAP HANA clients need to quickly load & unload the database.

- **Health Care Applications**

- Reduce check in times and better usage of medical supplies, and test results such as medical information being available to Doctors in seconds not hours or days.

Complete Peace of Mind with IBM FlashSystem 9100 IBM Storage & SDI

- **NVMe Future-proof – SCM Capable**

NVMe end to end today – industry leading performance
NVMe-oF (FC and Ethernet) support when standard solidifies

- **IBM data reduction guarantee**

Flexible guarantee: up to 5:1 data reduction
Express guarantee: 2:1 data reduction

- **IBM availability guarantee**

IBM guarantees 100% data availability for systems using HyperSwap and deployed by IBM Lab Services

- **IBM controller upgrade program**

No up-front charges, no contractual commitment to buy

- **7 year 24x7 Support**

Up to 7 years support available with flash media retention offerings

- **Endurance**

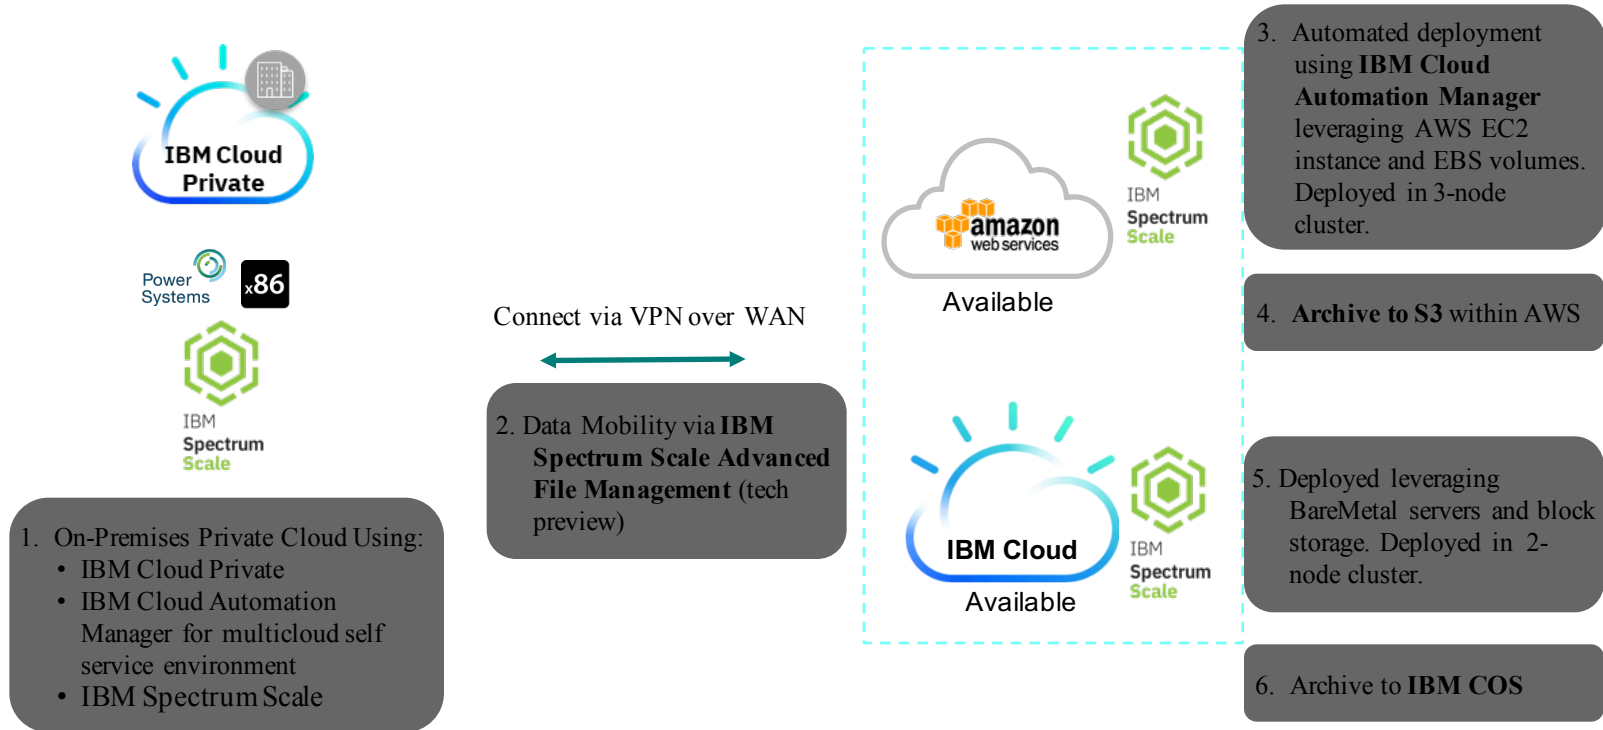

IBM FlashCore Modules will be covered for read/write endurance while you are under warranty or maintenance

- **Migration**

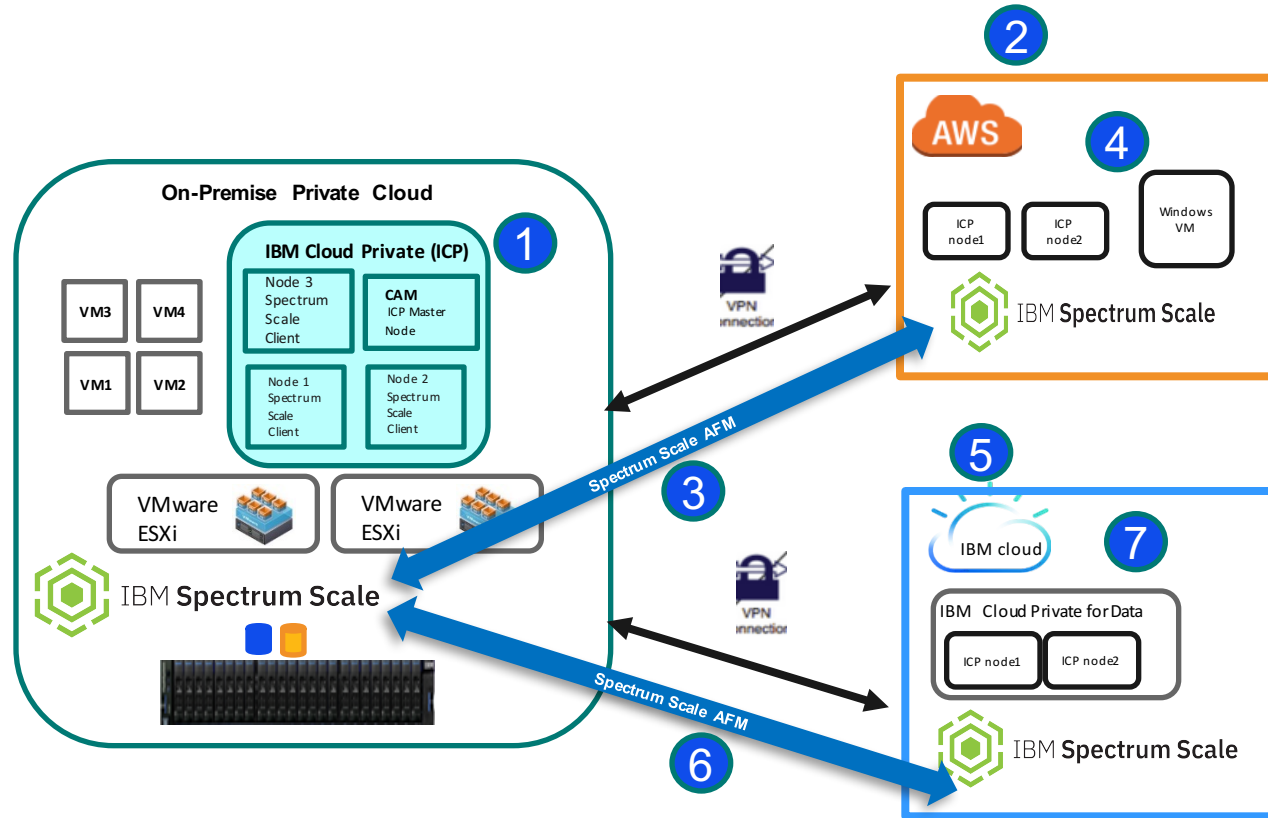

Up to 45 days to migrate data at no extra charge

Hybrid Workflows: Data Agility and Collaboration with IBM Spectrum Scale

IBM Hybrid Multicloud Solutions – IBM Spectrum Scale

1. On –premise resource Orchestration
2. Automated deployment of IBM Spectrum scale in AWS.
3. Data movement from On-premise to AWS Cloud
4. Business users accessing the data in AWS cloud.
5. Provisioning of the resources in IBM Cloud
6. Data movement from on-premise to the IBM cloud for analytics.
7. Data scientist access the data using IBM Cloud Private for Data.

Let the IBM Cognitive initiatives drive innovation

Leverage
IBM enabled solutions to deliver compelling choices that can deploy quickly

Deliver
proven and enabled solutions that produce high client satisfaction

Deploy
optimum, right sized solutions with best practices

Partner
with IBM global sales, partner ecosystem and support to deliver to any opportunity regardless of size

Proven
solutions for Multiple industries and venues

Innovation
is what we help our customers deliver to their business's
