

Introducing SGTech

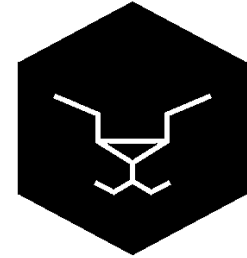

ADVOCATE FOR INDUSTRY

SUPPORT SINGAPORE AGENDA ON TECH

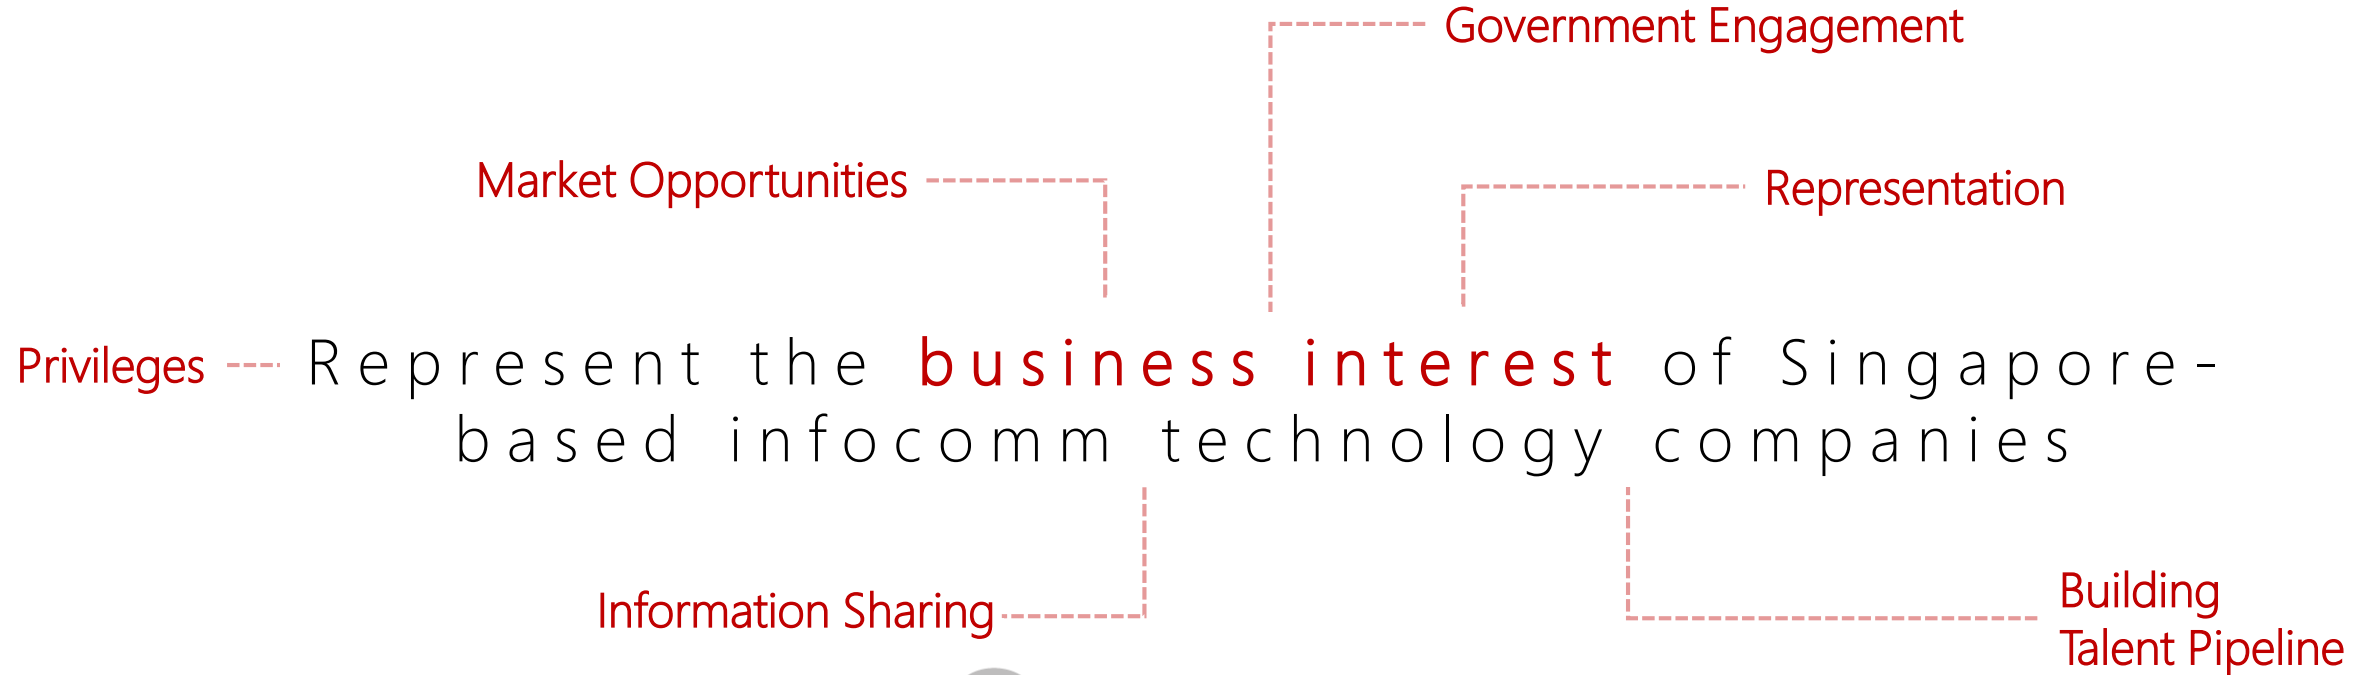

SGTECH

Council Representation

TAIGER

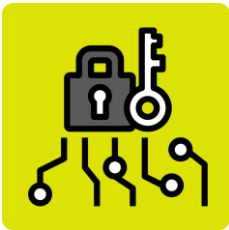

Cloud & Data Chapter (CDC)

To address the key issues in moving Cloud & Data to the next level of adoption by the industry and businesses.

Digital Chapter (DxC)

To serve as collective representation of digital media, mobile and wireless companies to foster strong working established relationships within member ecosystem, government agencies and vendors.

Cyber Security Chapter (CSC)

Promote awareness of the need for cyber Security and the role of Governance in the scheme, and drive the growth and competence of the security industry to position Singapore as regional cyber security hub.

Singapore Enterprise Chapter (SEC)

Focus on local enterprise development, local technology product development, regionalization of local technology companies, and the development of the China and Asia markets

AI & High-Performance Computing (AI & HPC)

To help users on adopting AI & High-Performance Computing, develop talent and create better awareness of AI

Smart Nation (SNC)

To engage the Smart Nation Digital Government Office (SNDGO) to focus on the "Built Environment" sector and encourage end-to-end localized solutions by integrating local and international offerings.

➤ Partnered with Info-Communications Media Development Authority (IMDA) and Workforce Singapore (WSG) to hold a talk addressing the industry's manpower needs.

➤ Conducted a "Future of Healthcare: Impact of AI & Data" conference centered around the use of AI and data analytics in the healthcare/medical sectors.

➤ In a bid to showcase the ecosystem comprising cloud and data providers, as well as data centres, a "Singapore Cloud & Data Driving Smart Nation" publication was launched.

➤ Members Networking Night

- Formed in July 2018 as part of the Cloud & Data Chapter, to discuss, share and champion issues that matter to the DC industry i.e. more energy-efficient setup with Paris Agreement 2030
- Comprises over **30 industry representatives** from DC operators, end-user DCs, equipment vendors, solution providers and consultants to date
- Past engagements:
 1. Successful dialogue with IRAS & industry resulting in withdrawal of proposed Property Tax Act amendments where data centre operators would otherwise face higher taxes
 2. Engagement with JTC on viability of underground data centres
 3. Industry sharing on green/tropical DC initiatives as well as networking, jointly hosted with IMDA
 4. SGTech co-hosted Data Centres Track on *DC Sustainability & Innovation* at IMDA Industry Day in Nov 2018

Data Center Committee

1. Facilitating exchange of thought leadership and best practices among industry
 - SGTech hosts Data Center Executive Roundtable *Building a Sustainable Data Center Ecosystem in Singapore* at Global Carrier Community Meetings (GCCM) SG – 15 Mar 2019 2pm @ The Intercontinental
 - Quarterly committee get-togethers to allow for such conversations
 - Curated speakers to share new industry knowledge i.e. fuel cells to power DCs

2. Enabling open dialogues with authorities on industry challenges and opportunities
 - Dialogue with relevant authorities namely EDB, JTC, IMDA & EMA – Apr/May 2019
 - DC Committee remains as a sounding board for new policies / initiatives i.e. DC Testbed for green technologies

3. Developing talent pipeline to meet DC industry's manpower needs
 - Working with IHLs to groom future facility engineers for DCs
 - Training IT application developers which would help optimise applications which help in overall contribution of DC operations

One-time entrance fee of \$1,000 **WAIVED**
for > 2 year membership with SGTech (i.e. up till June 2021)

Additional 10% discount if you sign up today!
