1. INTRODUCTION

The SCA conference is an annual international HPC event that encompasses an umbrella of notable supercomputing and allied events in Asia. Established in 2018, the conference is co-organised by HPC centres from Australia, Japan, Singapore, and Thailand and has become a key networking and collaboration platform for the regional and global supercomputing community. The event attracts HPC thought leaders, decision-makers, academics, multinational corporations, commercial partners, and industry professionals.

2. HOST ORGANIZATIONS

Since its inception in 2018, SCA has traditionally been held in Singapore, serving as a vital meeting point for the global supercomputing community in Asia. However, in a momentous move, the 2024 edition took place in Sydney, Australia, marking a significant expansion of its reach. Looking ahead, the co-organisers are committed to further broadening the event's impact across Asia

3. IMPORTANT DATES

Important Dates
